BIT Aggressive Growth R-I (EUR)

WKN: A2QJLA ISIN: DE000A2QJLA8

Investment strategy

The BIT Aggressive Growth fund (formerly BIT Global Fintech Leaders) is an actively managed, benchmark-independent equity fund that invests globally and sector-agnostically in technology-driven growth companies. As the offensive expression of the BIT Global Technology strategy, it complements the core portfolio of BIT Global Technology Leaders as well as the more defensive BIT Defensive Growth variant. The portfolio combines highly concentrated single-stock positions aimed at capturing structural technology winners with satellite positions in early scaling phases. The focus is on concentrated positions in companies that may benefit from structural technology-driven and, in particular, AI-driven growth processes. Options and derivatives may be used to actively manage market exposure, the risk profile and the return profile. Through valuation-sensitive stock selection and the weighting of high-growth companies, the fund seeks to achieve the most positive possible performance over the recommended investment horizon of at least five years. The flexible investment approach aims to dynamically adapt the portfolio to changing market conditions, technological innovation cycles and structural shifts within the global technology universe.

Commentary as of 31.07.2026

The fund delivered a return of -14.3% in July.

In line with the fund's revised strategy, we selectively reduced fintech exposure and reallocated capital toward our highest-conviction ideas across AI infrastructure, healthtech, and consumer tech. The repositioning provided relative support, with Navan and Robinhood among the strongest contributors. Volatility remained elevated, particularly across AI infrastructure, where advances in open-source models and technically driven selling by leveraged investors amplified the correction. Profit-taking in selected infrastructure holdings and broader diversification helped mitigate the impact.

Navan benefited from strong quarterly results, with gross booking volume up 50% year-over-year. Its new MCP interface connects travel and expense data directly with AI applications, enabling corporate clients to automate end-to-end business travel planning and booking. Robinhood delivered strong Q2 growth, with equity and options volumes rising 85% and 50% year-over-year. Prediction-market volumes increased 15-fold and are becoming a meaningful revenue driver, while new card, retirement, and banking products further support its ambition to build a global financial super app.

Toward month-end, strong hyperscaler cloud results confirmed their capacity to sustain further AI investment. We continue to assess opportunities dynamically across infrastructure and applications and adjust portfolio weights as technology evolves.

Disclaimer

This is a marketing material.
Please read the prospectus and the key information document (PRIIPs KID) before making a final investment decision. Legal basis of the investment in the fund is the PRIIPs KID, the currently valid prospectus, the most recent audited annual report and the most recent unaudited semi-annual report. The aforementioned documents are available free of charge in German from Hansainvest (Hanseatische Investment-GmbH), Kapstadtring 8, 22297 Hamburg (check <https://fondswelt.hansainvest.com/de/fondswelt/fondsuebersicht>). Risks can be found in the prospectus. The PRIIPs KID must be made available prior to the investment. The tax treatment depends on the individual circumstances of each investor. This marketing material is for information purposes only and does not constitute a solicitation to buy or sell shares of the fund. In particular, the recipient is recommended, if necessary with the assistance of an advisor, to check the information with regard to its compatibility with one owns personal circumstances, legal, regulatory, tax and other consequences. No assurance can be made that the investment objectives will be achieved. This marketing material is directed exclusively to interested parties in countries in which the fund is authorized for public distribution.

The fund was established under German law and is authorized for distribution in Germany, Austria and Switzerland. The fund may not be publicly offered for sale in the United States of America or for the benefit of U.S. persons.

Past performance, simulations or forecasts are not a reliable indicator for future performance. The gross performance according to the BVI method does not take into account the costs charged on issuance and redemption of shares (subscription fee and redemption fee) and fees incurred during the holding period (e.g. transaction costs). If an investor wants to invest shares for EUR 1,000.00, with a subscription fee of 3% the investor must pay EUR 1,030.00. The investor may incur custody costs and other costs, which reduce the performance. It should be noted that the value of the acquired shares may fluctuate due to fluctuation in the underlying investments of the fund and the listing of the securities.

Opportunities & Risks

Opportunities: Technology stocks offer significant long-term return potential. Through successful single-stock selection, active management may provide the opportunity to generate additional returns.

Risks: The BIT Aggressive Growth fund actively invests in high-growth technology companies and may therefore be subject to fluctuations in value. The fund invests independently of a benchmark. The technology sector may underperform the broader market. General, geographic and geopolitical country risks as well as currency risks may negatively affect performance. Due to its concentration in a limited number of individual securities, the fund's performance is highly dependent on the performance of individual holdings. Although the fund seeks to generate steady capital appreciation, this cannot be guaranteed. If fund units are sold at a time when the redemption price is below the purchase price, the invested capital will not be fully returned. However, the investor's risk is limited to the amount invested. Investors should understand these risks before making an investment decision in relation to these financial instruments. An investment in this fund is therefore suitable for investors with a long investment horizon and the corresponding willingness and ability to bear risk.

Please read the sales prospectus, mainly the risk information within the sales prospectus, to overview all opportunities and risks.

BIT Capital - Berlin Investment Technologies

BIT Capital is an asset manager combining the expertise of an industry leader in asset management with the agility and drive of a young technology company. The actively managed equity and crypto funds empower investors to benefit from both mass-market potential of established technologies and the high growth potential of emerging technologies and their adoption leaps. At BIT Capital analysts and algorithms work together as a team, where humans and technology complement and enhance each other.

The experienced BIT Capital team comprises 40 professionals includes a 20-person investment team made up of financial market experts, sector specialists, data engineers and software developers. With its investment products, BIT Capital offers investors the opportunity to participate in the future growth of an increasingly technologized world. Driven by our core philosophy "Ahead of the Curve" - we position ourselves to be where megatrends and major investment opportunities of the future already taking shape.

In doing so, the BIT Capital Team navigates the constantly evolving landscape of complex technology sectors and identifies tomorrow's industry leaders at an early stage for its investors.
